SPOTLIGHT ON INDIVIDUALITY

The more stressful our everyday lives become, the more important the home becomes as a retreat. And more than ever before, the bathroom is the place where you can relax and recharge your batteries. New living concepts with seamless transitions between bathing and sleeping areas or spacious wellness zones are increasingly on trend. No matter how much space you have, innovative solutions are a must. And for every generation, comfort and user friendliness are just as important as timeless, aesthetically pleasing solutions. Duscholux meets these demands with its targeted product ranges and new, individual products.

By opting for Duscholux you are always making an excellent choice. Because the Duscholux product range is backed by the experience of an international success story going back 40 years and our resolute dedication to our Swiss roots. With few exceptions, Duscholux shower enclosures bear the "Swiss made" quality mark. Developed and manufactured at our head-quarters in Thun, our products enjoy an excellent reputation. Because "Swissness" is synonymous with values like quality, solidity and sustainability. This is a promise you can rely on. Right from the word go.

THE COMPETENCE OF A STRONG BRAND

Duscholux produces functionally sophisticated bathroom and spa installations and is one of the world's leading shower enclosure manufacturers. Many of our products have received international design awards and become classics. These are the outward signs of over 40 years of experience. In-house design, trend-setting technology, high quality materials and superb workmanship, these essential features characterise our product manufacture. And they show in all our areas of competence: shower enclosures, room concepts, acrylic bathtubs and spa features.

However, beautiful lines do not necessarily equate to good design; high quality materials do not necessarily guarantee long years of product enjoyment. This is why we scrutinize each new product idea and technology in great detail before going into production. The decisive criterion is that our products should fulfil the high demands made by our customers. We make every effort to ensure the wellbeing of our customers and to fulfil their every wish. We refine each new idea with a great love for detail. And our customers feel and experience this every single day.

THE RIGHT DECISION

When you opt for a Duscholux product, you are benefiting from a strong, competent team with extensive expertise. The Duscholux Sales and Customer Service team will advise you on the best use of your available space and will work with you to design the perfect solution. Tricky installation situation? Not a problem. We love the challenge. With our products and custom solutions we will come up with a design that meets your specific needs in no time. Ask to see our products in bathroom showrooms, or visit our own showroom and talk to one of our advisers in person.

But at Duscholux we don't stop helping you once you've bought your bathroom products. Technical advice, taking measurements and installing shower enclosures are all part of our service. Even after your purchase, our in-house and mobile Customer Service teams are on hand to answer any questions you may have. You can also find full information on Duscholux and our products at www.duscholux.com or from your local authorised dealer or fitter. We look forward to hearing from you!

CLEARTEC

GLASS FINISH

HIGH-QUALITY FINISH ON SAFETY-GLASS SHOWER ENCLOSURES

Modern shower enclosures have to meet extremely tough standards. A key aspect is material properties that guarantee a long life span and easy care and cleaning. Working with Nanogate Technologies GmbH, the Duscholux research team has developed a groundbreaking new process: the Cleartec finish for tempered safety glass. Based on nanotechnological material developments and the use of minute particles known as nanocomposites, they have developed a new material that has impressive coating properties:

- A chemical bond forms with the surface of the glass, causing excellent adhesion and making any coating that is applied last much longer than usual.
- Because they are so small, the nanoparticles are much less susceptible to abrasion and therefore boost the material's durability and UV resistance.
- The surface energy is so strongly reduced that water and oils are repelled, forming droplets that simply run off.
- Dirt and limescale deposits are reduced, making the glass much easier to clean and look after.

1

2

3

1) The Cleartec finish is applied to the glass in the Duscholux factory.
2) The glass panels are thoroughly cleaned before finishing.
3) The glass undergoes a two-stage coating and polishing procedure.

Dirt and limescale are much easier to remove from glass treated with Cleartec. All you need is a mild, neutral cleaner and a soft, non-abrasive cloth. Under average conditions the Cleartec finish will last for several years, but not indefinitely. When the effect diminishes, the coating can be refreshed with a top-up kit.

HERACLITUS | GREEK PHILOSOPHER

DUSCHOLUX PREMIUM PRODUCTS

Sophisticated design and award-winning innovations meet the highest demands in terms of showering and bathing. For those looking to create an elegant ambience in their bathing zone, we offer carefully selected materials, high-quality finishes and tailor-made solutions with a host of options – for spacious, individual results.

TRANSPARENCY AND CLEAR LINES

Collection 3 is a new frameless shower enclosure series with striking contours, fulfilling even the most stringent aesthetic requirements. Flat hinges and wall brackets made from chrome-plated metal, slim-line crossbars and an innovative handle complement the linear design. A visual highlight for modern bathroom solutions.

COLLECTION 3, FEATURES

- Frameless shower enclosure series with glass of 8 mm
- Smooth internal surfaces for easy cleaning
- Wide range of custom installation options and sizes
- Swing doors open inwards and outwards
- Lift-and-lower mechanism on door hinges
- Magnetic closures integrated into aluminium strips
- Choice of crossbars for stability
- Optional wall connection profile
- Standard height 2000 mm
- Glasses up to 2200 mm available
- Three handle options

Collection 3, swing door with fixed panel and two side panels. Providing coherent overall lines: chrome-plate covers hide technical fittings made from high-quality zinc die-castings without interfering with the desired transparency.

SHOWER ENCLOSURE
COLLECTION 3

PRODUCT DIVERSITY AND INDIVIDUALITY

The actual versatility of Collection 3, is apparent from the different room situations to which this shower enclosure series easily adapts. This is due to the numerous product models offered as part of the Collection 3 standard range. Irrespective of whether the shower features a corner entry, a side panel, a round design or is fitted in a recess – the product range covers different dimensions and combinations. Great diversity can be so individual.

The area available determines the Collection 3 modules used. If required, additional side panels can optimize the shower area. The fixed panels of the doors can be reduced down to 180 mm.

1) Collection 3, swing door with fixed panel in combination with side panel

2) Wall connection profiles that can easily compensate wall bevels of up to 12 mm complete the Collection 3 range.

- 3) Flush handle inside view
- 4) Hinge inside view
- 5) Towel rail, outside view
- 6) Towel rail, inside view

The trend-setting adhesive technology of Collection 3 provides flush interior surfaces without any protrusions. This makes it considerably easier to clean the shower panel.

AMAZING DESIGN FOR ANY BATHROOM

Depending on your personal preference Collection 3 can add an expressive or a restraint look to your dream bathroom. And that is a further strength of the system. Two hinge options allow direct connection to the wall or installation in connection with a fixed part – and that in a variety of different dimensions, thus providing an optimum and sophisticated solution for room corners and recesses.

1) Collection 3 recess-mounted swing doors. Transparent does not always mean a clear view. Collection 3 offers a number of glass solutions and optionally also with partial fine satin effect with a stripe height of 900 mm.

2 + 3) The wall hinges reflect the design principle of Collection 3 shower enclosures. They are flat with fine chrome plating and fix the glass safely to any wall.

4) Collection 3, swing door in recess with side panel in line

TAILOR-MADE AND SPECIAL

Collection 3 focuses on providing planning and installation options. It offers convincing solutions for any bathroom layout by offering individual glass treatment -bevel or cutout- and shower enclosure heights of up to 2200 mm. Special requests do therefore not represent a technical problem and are simply manufactured to your requirement.

1

2

3

- 1] With Collection 3 your bathroom becomes more than just a wet room – providing solutions for any requirement.
- 2] A glass cut-out providing special luxury for your shower. There are no limits as regards individuality and personal taste.
- 3] The unobtrusive and attractive water deflector strip ensures that any leaking splash water remains in the shower area.
- 4] Collection 3 individual solution, swing door with fixed panel and side panel, glass cut-out as required.

STANDARD SOLUTIONS WITHOUT COMPROMISE

The special feature of Collection 3 is the many high-quality solutions offered by its basic product range. Apart from a generous standard height of 2000 mm and swing doors with lifting and lowering mechanism, the range offers continuous flush interior surfaces as well as chrome-plated hinges, wall brackets and handles. In addition there are numerous models and combination options for installation and equipment – offering considerable scope for individuality and creativity.

2

3

4

5

1] Collection 3 corner entry with fixed panels. The corner solution for purists: straight lines ideally adapted in height and size to existing room proportions.

2 + 3] Latest UV and light-curing adhesive technology allows hinges made from chrome-plated zinc diecasting to be permanently connected to the external surfaces of the glass.

4 + 5] The wall brackets, too, support the flush design of Collection 3. The pre-assembled adapters are regularly subjected to load tests of up to one ton.

COLLECTION 3

SMARTER DETAILS

Outward and inward opening swing doors made from sturdy 8 mm glass keep dripping water inside the shower. The convenient lifting and lowering mechanism on the door hinges supports smooth opening and closing – a perfect sequence of movements that highlights the high quality of this shower enclosure series. Another benefit: the handle, which follows the design contours of the shower enclosure, is supplied as a flush internal model as standard. The retractable grip disk ensures reliable operation inside the shower.

- 1) Collection 3 Five
- 2) Flush standard handle, inside view
- 3) Optional door knob, inside view
- 4) Optional rectangular handle, inside view

5) Collection 3, Round version for space-saving corner solutions. With its generous standard height of 2000 mm, Collection 3 is also the perfect combination for ultraflat shower trays such as the Duscholux Free Base.

GENEROUS PROPORTIONS AND FLOOR LEVEL COMFORT

In particular in shower areas of generous proportions freestanding walk-in solutions can produce an attractive architectural feature. The floor level glass structure without doors reduces the number of required fittings and emphasises the transparent harmony of the design. An additional 90° side panel improves splash protection, making showering an even more pleasant experience.

2

3

4

1) Collection 3 freestanding side panel with additional splash protection. The two panels can be joined using a narrow corner profile or with two fittings. Collection 3 offers walk-in solutions of up to 2300 mm height.

2) Providing an attractive as well as a sturdy design. The elegant crossbars are available in various models.

3) Glass elements can be joined with a flush interior fitting. The hinge inside the fitting enables the panels to be fixed at different angles.

4) Collection 3, freestanding side panel. The crossbars can be ordered as illustrated or as an L-shape version (see also left image).

COLLECTION 3

CRYSTAL CLEAR ROOM CONCEPTS

The generously proportioned Collection 3 solutions with ceiling support offer optimum scope for creative interior design. The straight-lined, silver anodised aluminium ceiling profile replaces the wall crossbar, providing perfect stability. The obstacle-free, floor-level access makes showering a true experience in the room. Or choose one of our many different combinations with a door insert to make your dream bathroom a reality. Pure, simple pleasure.

1) Collection 3 with ceiling support. Instead of the fixing brackets, a wall connection profile can even out unevennesses of up to 12 mm.

ENDLESS OPTIONS

Frameless - fluid borders. Scarcely perceptible. And yet the Collection 2 series sets standards through its clear, harmonious aesthetics. A pleasure for body and soul. An invitation to start the day with sheer enjoyment. It's the little things in life that make it special. Logically worked out hinge technology, top-quality safety glass, swings doors that open inwards and outwards. These are the high-tech features of the Collection 2 frameless shower enclosure series. Quality you can see and experience. And not only are the details extremely logical, but there is also no limit to the installation options. No matter whether Rectangular, Round or Five. Collection 2 has a great number of versions, thus is the optimal choice to fit in your bathroom.

COLLECTION 2, FEATURES

- Frameless shower enclosure series
- Wide range of custom installation options and sizes
- Swing doors open inwards and outwards
- Lift-and-lower mechanism on door hinges
- Optional wall connection profile
- Standard height 1900 mm
- Rectangular or oval fittings and handles
- Two additional handle options
- 360° hinge on overbath screens

COLLECTION 2

1

2

EXACTLY THE WAY YOU WANT IT

Trim, clear. Simple, elegant. The straightlined aesthetics of the Collection 2 rectangular and niche versions turn your bathroom into an experiential space. Consummate in form: the elegant hinges and handles. Optimal handling and perfected functions. This is functional expression of the sophisticated overall design. Most interesting: Replaceable and continuous sealing profiles along the door elements ensure the greatest possible leak-proof consistency and easier care and cleaning. Collection 2 is also available with wall connection profiles that can easily compensate wall bevels of up to 12 mm.

With Collection 2, you are spoilt for choice - you choose the hinges and fittings you want. The model comes equipped standard with angular hinges, mountings and handles. You also have the option of selecting the round, oval form and freely combining the handles of your choice. All this at no extra expense! Just state your wish when ordering.

- 1) Collection 2, corner entry with fixed panels, oval fittings and hinges.
- 2) Collection 2 swing door with fixed panel and side panel, rectangular hinges and fittings, here shown with wall connection profile for compensation of wall bevels.
- 3) The round handle is standard for oval hinges and fittings.
- 4) The rectangular handle is standard for rectangular hinges and fittings.
- 5 + 6) These handles are available as options.
- 7) Hinge and fittings version "rectangular".
- 8) The cross bar provides stability.
- 9) The water drip profile - in white, silver or black - keeps water splashes inside the cabinet.
- 10) Hinge and fittings version "oval".

10

INDIVIDUAL AND UNIQUE

Collection 2 is also the right choice for unusual spatial situations. Angles, cut-outs or an individual adaptation to spatial conditions. An irresistible Collection 2 solution is possible for almost any and every bathroom. Unique products for unique bathrooms. Clever technology, appealing functionality. Swing hinges mean the doors open both inwards and outwards. The advantage: in small bathrooms and after a shower, it often makes sense to open the doors inwards. Residual water stays inside the shower if the door is opened inwards to exit.

Make your Duscholux shower enclosure unique by combining different panels. Opt for fully mirrored or a more economical mirrored side panel instead of a full-length mirror in your bathroom. Do you prefer a little privacy when showering? Then a full-length or partial satin effect is the ideal choice.

1] Collection 2 is the perfect shower enclosure series for individual, tailor-made solutions.

2] Collection 2, swing door with fixed panel and side panel, side panel in mirrored glass. Please note that the mirror effect allows much less light through into the shower.

3] Collection 2, swing door with fixed panel in niche, fine satin glass finish

Clear forms. Harmony that is elegant and creates spaciousness. Collection 2 Round offers a wide, comfortable entrance. An invitation to endless showering pleasure. The Round is available with a side hung door or as a two-door version with swing hinges that allow the doors to open inwards and outwards. Solid hinge technology, decades of experience in development, fatigue tests, high quality and tested materials. These are corner points and successes for years of pleasure in a Collection 2. Pared down to the essential. Collection 2 Five is the clever interplay between high quality glass elements and elegant fittings. Accentuated with well-designed handles.

2

- 4) Collection 2, swing door with side panel

4

COLLECTION 2 OVERBATH SCREENS

Easy handling: the Collection 2 range of frameless shower enclosures is augmented by a one- to three-panel overbath screen. The solid, easy-care components are striking for their clear, straight-lined design and practical handling. The 360° pivot hinge in the two- or three-panelled version has the special advantage of being easily able to swing the door elements outwards or inwards. The rounded corners enhance the striking appearance of this alternative folding panel solution for more discerning requirements.

1) The two-winged version is available with a swing or fixed first enclosure panel
2) Overbath screen, 1 panel

3) Collection 2 overbath screen, 3 panels.
1st panel fixed, 2nd and 3rd panels rotate 360°

3

GLASS-CLEAR VIEW

Life. Take it easy. Keep things transparent. Free-standing shower enclosures are in fashion. With Collection Life you meet this trend all the way. Elegance and lightness shape the Life variants. The reliable function of the frameless Collection 2 shower enclosure series combined with the aesthetics of spacious bathrooms. Joy in life that begins with the shower in the morning.

COLLECTION 2 LIFE, FEATURES

Frameless shower enclosure series for walk-in solutions

Wide range of custom installation options and sizes

Can be attached with ceiling support or wall crossbar

Optional wall connection profile

Height of glass up to 2100 mm

Rectangular or oval fittings

360° hinge on swing door panel

AROUSE YOUR SPIRITS

ELEGANT STABILITY WITH WALL CROSSBAR

The possibilities are almost endless with Collection 2 Life. With or without wings; wall installation or free-standing in the room? Whichever variant you choose, you will not miss the door here. Barrier-free access to the shower area creates a modern lightness and makes it much easier to clean the shower partition. Collection 2 Life - architectural elements positioned freely in the room and adapted to your bathroom situation.

COMPELLING TRANSPARENCY

Transparent and puristic furnishing solutions are popular in bathrooms. They are especially attractive when freely positioned in the room. With its flexible solutions the shower and partition system Collection 2 Life, which is now available with ceiling supports, offers the maximum freedom in planning and furnishing. Collection 2 Life sets architectural accents that are a pleasure to look at every time.

SHOWER ENCLOSURE
FREE LOFT

MODERN DESIGN WITH EXCLUSIVE FUNCTIONALITY

Anyone who regards showering as a pleasurable experience, and is therefore looking to incorporate beautiful design and a way of keeping their bathroom neat and tidy, will love our innovative Free Loft. This exclusive glass shower enclosure has an integrated storage system with a towel rail, solving the problem of housing all the necessary shower essentials in a single product. And with its new, striking design the shower enclosure can now take its place as an integral part of the bathroom architecture.

A SHOWER EXPERIENCE FOR THE SENSES

Appreciation for the unique: Free Senses is a modular, dimensionally adjustable shower panel which enables the highest degree of individuality with its integrated fittings and functions and has shower enclosure elements that can be combined to form a system. Free Senses opens entirely new architectural possibilities - even in unusual locations. Free Senses is adaptable enough to complement almost any interior configuration, whether as part of an authentic glass enclosure in a corner or along a wall, or as a standalone solution.

FREE SENSES, FEATURES

Variable panel system for spacious showers

Wide range of installation options with Collection 2

Head shower, hand-held shower and three body showers

Portal, wall or corner version

Height 2000 mm or 1700 mm

Version for bath with integrated water inlet

Minimum tub width 90 mm

Minimal installation required

FREE SENSES

1

Thanks to its extraordinary flexibility, Free Senses can serve as everything from an attractive single shower panel to the centrepiece of an expansive bath landscape. Its groundbreaking array of inspired interior-design possibilities promises comfort and character in equal measure. Integrating Free Senses into various configurations to maximum effect can be accomplished with minimal installation effort. Handheld, head and body shower elements are included in the standard design of Free Senses. If so desired, these typically wall-mounted functions can also be housed in a shower column and positioned opposite to the wall.

2

1 + 2) Free Senses as a shower panel for the bathtub: The bath inflow is integrated into the shower panel. Additional bath fittings are not necessary.

3) Free Senses wall version 2200 mm with shower enclosure Collection 2 Life and Free Base shower tray.

4) Free Senses corner panel with Bella Vita shower and Free Base shower tray

FREEDOM OF MOVEMENT FOR BOTH YOUNG AND OLD

Floor-level entrance to the shower. Comfort and freedom of movement. No problem with Free Base, the ultra-flat shower tray in nineteen standard sizes tailored to spatial conditions and dimensions. Because Free Base is the ideal starting point for designing individual shower solutions, spacious showering zones, difficult room configurations, niches and easy-access solutions.

2

1) Free Base shower tray

2) Ultra-flat round shower trays allow even more room for play in your bath design.

SHOWER TRAY
FREE BASE

1

FREE BASE, FEATURES

- Ultra-flat, floor-level shower tray
- Made of body-friendly sanitary acrylic
- 19 sizes available, rectangular or round
- With installation set to ensure secure seal
- Installation height with set from 135 mm
- Meets strict sound insulation requirements
- Drain and overflow cover in tub colour or chrome plated

FREE BASE

Developed together with bathroom fitting manufacturers Illbruck, the special floor-level shower tray installation set connects to the Free Base shower tray to form a sealed system. The ready-fitted sealing strip on the polystyrene support reliably prevents water from penetrating through to the building fabric. Guaranteeing a perfect seal.

Also as partner tub: 2200 x 1630 x 550 mm

Low entry height, tub depth: 410 mm

Effective volume: approx. 250 l or 415 l

BATHTUB
CAPRIVI FREE

Caprivi Free, partner tub for relaxed bathing for two

CAPRIVI FREE

It's feel-good time. Lie back in a bathtub filled to the brim. Thanks to its overflow channel, Caprivi Free is a particularly shallow bathtub with a low entry height. The wide ledge around the elegant surround has plenty of space to house the taps.

- 1] Caprivi Free single bath with step adapter to conceal supply pipes
- 2 + 3] It's the overflow channel that makes it possible: lie back in a bathtub filled to the brim and enjoy the full depth of the water.
- 4] The optional elegant wenge wood effect paneling forms an uncompromising whole with the tub.

BATH ARCHITECTURE REDEFINED

Based on its appearance, the Cube falls more under the category "furnishings" than "bathroom appliances." Architectural qualities comparable to those of prominent international spa and wellness facilities can now be at your fingertips. A perfectly integrated steam bath and attractive household element in one, the Cube makes an ideal at-home wellness centre. One look at its refined materials, flawless aesthetics, and lack of functional embellishments will win you over. The unit's integrated storage elements can house items that would otherwise lead to clutter.

CUBE, FEATURES

- Exclusive wellness centre for the home
- Steam shower and furniture cabinet in one
- Rain shower, hand shower and 6 side jets
- Mirror cabinet module with storage space
- Wall or corner mounted, height 2280 mm
- 2 sizes: 1300 x 1200 mm or 1300 x 900 mm
- LED lighting, back cushion, shower stool
- Easy to use touch-screen controls
- With optional sound module and colour light therapy

STEAM SHOWER
CUBE

FOR PERFECT RELAXATION

Duscho Free Cube is available in two different sizes as well as wall and corner versions. Additional equipment options, such as coloured light or sound accessories round out the exclusive product range. For perfect relaxation after a long day.

2

3

- 1] There's an impressive range of practical features and high-quality materials on the inside.
- 2] Elegant branded fixtures accentuate the interior equipment.
- 3] Extensive storage space in the integrated cabinet element.

4] Cube, 1200 x 1300 mm
